

Your APSS Annual Report

Contents

About this report

Your Australia Post Superannuation Scheme (APSS) 2014 Periodic Statement is made up of two parts:

PART 1: 2014 BENEFIT STATEMENT

contains personal information to help you understand your benefits over the 2013-14 financial year. You will receive this separately in the mail.

PART 2: 2014 ANNUAL REPORT

is this document. It contains general information about the APSS including its financial condition, management and investment performance over the 2013-14 financial year. This document is available online or can be mailed to you free of charge by calling *SuperPhone* on **1300 360 373**.

Important

The Trustee of the APSS and issuer of interests in the Australia Post Superannuation Scheme (APSS) is PostSuper Pty Ltd, ABN 85 064 225 841 (RSE Licence Number L0002714). The APSS's Registration Number is R1056549 and its ABN is 42 045 077 895.

PostSuper Pty Ltd, Australia Post or Associated Employers do not hold an Australian Financial Services Licence and therefore, neither is licensed to provide you with financial product advice. The Periodic Statement (Parts 1 and 2) does not contain financial product advice, so you should not rely on it as such. Before making any decision based on this information, you should obtain and read the relevant APSS Product Disclosure Statement (PDS) and consider seeking independent financial advice relevant to your personal circumstances.

A message from your Trustee

A warm welcome to the 2013-14 Annual Report.

Inside this annual report you will find the latest news about your super, how the APSS performed during the past financial year, how your super is invested and some general information about superannuation.

Through the past financial year, the APSS continued to provide secure employee defined benefits and positive investment earnings on Member Savings accounts. You can find out more about our investment performance by reading the *The year in review* section on page 4 of this report.

Besides the information in this report, you will find a wealth of information and news at apss.com.au. Just a few months ago, we also re-launched the website to help make it easier for you to navigate and find the information you need. We also continue to maintain a free helpline. By calling *SuperPhone* on **1300 360 373**, you can speak to a knowledgeable operator about your super questions.

You, our members, are our number one priority. Our aim is to consistently improve our products and services and to help you achieve your retirement goals. We're always keen to hear about anything we could be doing better. If you have any feedback you'd like to provide, please let us know.

Helping you to plan a secure future

As a member of the APSS, you are part of a diverse group, some at the start of their working life but a great many approaching that time when thoughts of retirement become more than just a dream, if they haven't reached it already. When that retirement dream begins to become a reality, it also brings to life some real and, maybe, challenging questions. Will I have enough super when I retire? What investment options should I choose? Furthermore, as a society we are also living longer, so how long will my super last? There isn't an obvious, single answer to these questions but the earlier that you can start thinking about and planning your retirement strategy, the better. And the APSS was set up to help you save for retirement, so please make the most of the services and options available to you.

The APSS currently offers employee members:

- Secure defined benefits
- The ability to make personal contributions from either your before-tax or after-tax pay to help boost your retirement savings
- The ability to save super for your spouse
- Real choice for your personal contributions between the security of Cash Return or the expectation of long term growth from Market Return Member Savings, or a combination of the two
- Additional death benefits (and disablement benefits, if applicable) to protect you and your family
- The option to retain your super in the APSS when you leave your employer
- Flexible pension options, depending on whether you want to transition to retirement while you are still working, or retire with an Allocated Pension.

We encourage you to make the most of the features and benefits offered by the APSS and take an active role in managing and educating yourself about your super in the APSS. When considering your super decisions, a licensed financial adviser can help. In this way you can be confident that you are making the most of your opportunities to secure a comfortable financial retirement.

Stay in touch

We encourage you to keep in touch with the APSS and keep your contact details and nominated beneficiaries up to date as your personal circumstances change. If you have any concerns or questions, there are options available to help you. You can visit apss.com.au or call *SuperPhone* on **1300 360 373** to speak to one of our dedicated member services team.

The year in review

It's important to keep in mind, when reviewing the 2013-14 Financial Year, that the investment returns of the APSS only affect the Member Savings (Employee, Spouse, Rollover) and Pension Accounts, and not your Defined Benefit entitlements in the APSS.

Market Return Member Savings

The Crediting Rates for Market Return Member Savings are determined by reference to the investment returns of the APSS's Market Return Portfolio. The APSS Market Return Portfolio is invested in a broad range of shares, real estate and bonds in both listed (public) and unlisted (private) markets around the world. The Trustee expects that the Market Return Crediting Rates will exceed the Cash Return Crediting Rates by a margin of 3-4% each year, on average over the long term.

The compound Crediting Rate for APSS Market Return Member Savings was **10.0%** for the financial year, net of tax and investment costs. The compound crediting rate for Pension accounts, which are currently exempt from tax on investment earnings, was **10.7%**.

The financial year to 30 June 2014 was a rewarding period for diversified investors, with asset values rising in most of the world's major share and bond markets, including Australia. Despite a range of political risks emerging around the world and warnings against becoming too optimistic, investment markets advanced on the themes of low interest rates, improving

economic performance and growing company profits. For the second year running, share markets led the way, with overseas share markets gaining in excess of 20% over the year, while the Australian share market gained around 17%. Bond markets delivered positive but lower returns.

The majority of the Market Return Portfolio has been invested in private markets, where asset values were influenced by the same fundamental economic factors as publicly-traded shares but tend to move up and down more slowly. The APSS's private market investments gained just under 13% for the financial year.

When assessing the Market Return Crediting Rate, it's a good idea to consider returns over the long term, because markets can fluctuate, both up and down, in the short-term. Over the 10 years to 30 June 2014, the Market Return Member Savings for employees have earned an average crediting rate of 6.9% per annum which is similar to the average for growth funds in the super industry.

Crediting rates

Crediting Rates are used to allocate investment returns to Member Savings in the APSS. There are different Crediting Rates for Market Return Member Savings and Cash Return Member Savings. Crediting Rates for each investment option are declared fortnightly and interim Crediting Rates are generally applied when benefit payments are made.

APSS Defined Benefits are calculated according to a formula that is based on salary and length of service, and are not affected by Crediting Rates.

The year in review (cont.)

How we compare

The following chart shows how \$1,000 invested in APSS Market Return Member Savings has changed over the last seven years compared to the same amount invested in publicly traded Australian and overseas share markets.

Values used in this chart are based on Russell Investments' Australian Shares and International Shares (Hedged) PST sector funds.

Important reminder: Past investment returns are not necessarily indicative of future investment returns.

Cash Return Member Savings

The Crediting Rates for Cash Return Member Savings are determined by reference to the investment returns of the Cash Portfolio. The APSS Cash Portfolio invests in high quality cash deposits or bank bills and short-term interest bearing securities. The Trustee expects that the crediting rates for Cash Return Member Savings will be similar to the cash interest rate set by the Reserve Bank of Australia (RBA), reduced by investment fees and tax (where applicable).

The compound Crediting Rate for the Cash Return Member Savings investment option was **2.1%** for the financial year, net of tax and investment costs. The compound Crediting Rate for Pension accounts, which are currently exempt from tax on investment earnings, was **2.5%**.

The RBA cut the official cash rate in August 2013, from 2.75% to 2.50%, then kept it at that rate for the remainder of the last financial year. The RBA has kept interest rates very low to support economic activity in Australia, on the expectation that low borrowing costs and, preferably, a lower Australia dollar, would encourage more consumer spending and investment, especially in the non-mining sectors of the economy. The consequence for APSS Cash Return Member Savings was a crediting rate that only just kept in touch with the inflation rate last financial year. Members electing this investment option in the APSS continue to enjoy the security of a Capital Guarantee provided by Australia Post on their Cash Return Member Savings.

Fortnightly Crediting Rates

If you have a Member Savings (Employee, Spouse, Rollover) or Pension Account, then the compounded Crediting Rates you receive will depend on the combination of investment options that applied to your account during the 2013-14 financial year. Contribution dates and other factors also play a role. Therefore, the compounded Crediting Rates shown below may not represent the actual rates that were credited to your account(s).

Fortnightly Crediting Rates 2013-14

Fortnight ending:	Employee, Rollover and Spouse Account		Pension Account	
	Market Return	Cash Return	Market Return	Cash Return
2/07/2013	0.90%	0.08%	1.05%	0.10%

Last 5 financial years	6.52%	3.16%	6.52%	3.16%	7.54%	n/a
Last 10 financial years	6.92%	n/a	6.81%	n/a	7.62%	n/a
Since inception	7.76%	3.79%	7.33%	3.79%	8.42%	3.78%

Important note: Past Crediting Rates are not necessarily indicative of future Crediting Rates. All rates shown are net of tax and investment costs (except for Pension Accounts which are not currently subject to tax on investment earnings).

Employee Member Savings and Spouse Accounts:

- [^] The actual compounded Market Return Crediting Rates are shown from the commencement date of Market Return Member Savings of 1 July 2007. Prior to 1 July 2007, all Capital Guaranteed Member Savings were invested in a similar investment strategy to the Market Return Portfolio. Therefore, the compounded average Crediting Rates covering periods prior to 1 July 2007 are based on the actual Crediting Rates for Capital Guaranteed Member Savings for those years.
- ^{*} The actual compounded Cash Return Member Savings Crediting Rates are shown from the commencement date of Cash Return Member Savings of 1 July 2007. Therefore there are no Cash Return Member Savings Crediting Rates prior to 1 July 2007.

Rollover

- [^] The actual compounded Market Return Crediting Rates are shown for financial years from 1 July 2008. Prior to 1 July 2008, the APSS Rollover used unit pricing rather than Crediting Rates. Therefore, the compounded average Crediting Rates covering periods prior to 1 July 2008 are based on the difference between the unit price for the APSS Rollover as at 30 June each year.
- ^{*} Although Cash Return Member Savings were only made available to APSS Rollover members from 5 August 2009, Cash Return Member Savings commenced on 1 July 2007. Therefore, the table shows the actual compounded Cash Return Crediting Rates since the commencement date of 1 July 2007.

Pension

- [^] The actual compounded Market Return Crediting Rates are shown for financial years from 1 July 2008. Prior to 1 July 2008, the APSS Pension used unit pricing rather than Crediting Rates. Therefore, the compounded average Crediting Rates covering periods prior to 1 July 2008 are based on the difference between the unit prices for the APSS Pension as at 30 June each year for those years.
- ^{*} On 5 August 2009, Cash Return Member Savings were made available to APSS Pension members. Although Cash Return Member Savings commenced on 1 July 2007 (available only to APSS Employee and Spouse members), the actual Cash Return Crediting Rates since 1 July 2007 are not comparable to the returns that might have applied to your APSS Pension Account had Cash Return Member Savings been available prior to 5 August 2009. This is because the investment earnings of APSS Pension Accounts are not subject to tax. Therefore, the compounded Cash Return Crediting Rates shown for APSS Pension Members are for periods commencing from 5 August 2009.

Investment objectives

Investment objective for Defined Benefit assets

The Trustee's investment objective for Defined Benefit assets is to formulate and implement an investment strategy that will, in conjunction with the APSS sponsoring employers' funding strategies, enable the APSS to pay benefits as well as other costs as they become due. In particular, the Trustee aims to formulate a strategy that has:

- a high likelihood that the APSS will have adequate liquidity to pay benefits and costs at all times as they become due; and
- a relatively high expected long term average net

investment return (defined, until otherwise agreed, to be 7.25% per annum, measured over rolling five-year periods).

The Trustee accepts that, to achieve a relatively high long term investment return, the annual investment return is likely to be relatively volatile. In particular the Trustee accepts the likelihood that:

- the investment return may be negative once in every four to five years on average; and
- the APSS Vested Benefits Index (VBI) is likely to fluctuate in a tolerance range of 90% to 110%.

Investment objectives for Member Savings (Employee, Spouse, Rollover and Pension Accounts)

Market Return Member Savings

The Trustee's objective for Market Return Member Savings is to credit returns over the long term that both exceed the rate of inflation and exceed the rate of returns credited to Cash Return Member Savings, after all taxes and costs are allowed for, while accepting that the annual return will be relatively volatile.

The Crediting Rates for Market Return Member Savings are determined by reference to the investment returns of a diverse portfolio of assets in the APSS, known as the Market Return Portfolio. The Trustee expects that the Market Return Crediting Rates over the long term will exceed the Cash Return Crediting Rates by a margin of 3-4% each year, on average over the long term. The estimated number of negative annual returns is expected to be 4 to less than 6 out of every 20 years.

The Trustee cannot guarantee that its long term expectation will be met, because investment markets are unpredictable. Historically, the markets for long term investments like those in the Market Return Portfolio have had greater rises than falls in the long run, but this is not necessarily a guide to the future. You should consider your long term investment objectives and personal financial circumstances. You should consider whether you have enough time before you need to access your Market Return Member Savings to withstand any periods when the investment markets may go down.

Cash Return Member Savings

The Trustee's objective for Cash Return Member Savings is to avoid any reduction in the dollar value of your Member Savings at all times, while also earning a rate of return that aims to at least keep up with inflation over the long term.

The Crediting Rates for Cash Return Member Savings are determined by the investment returns of the Cash Portfolio.

The Trustee expects Crediting Rates for Cash Return Member Savings to be similar to the cash interest rates set by the Reserve Bank of Australia, less investment costs and tax, where applicable.

Cash Return Member Savings are protected by a Capital Guarantee provided by Australia Post, which means that the Crediting Rates for Cash Return Member Savings cannot be negative. However, the Capital Guarantee does not cover the risk that inflation may reduce the future purchasing power of your Member Savings.

Investment strategy

Trustee's investment strategy

The funds in the APSS are divided into two investment portfolios, the Market Return Portfolio and the Cash Portfolio. Member Savings are allocated between these two portfolios. The Defined Benefit assets are invested in the Market Return Portfolio.

The Market Return Portfolio is a diversified portfolio of assets that are invested mainly for the long term. The Trustee's investment strategy for the Market Return Portfolio involves making allocations between classes of the world's financial assets that have different degrees of financial risk (and therefore, different levels

of expected return) and ensuring that each allocation includes a wide array of financial assets in that asset class to reduce the overall impact if some investments fail. The main asset classes that the Trustee invests in are set out in the table below.

The Trustee's investment strategy for the Cash Portfolio is different from the Market Return Portfolio. The Cash Portfolio may include bank deposits or bills and short-term interest-bearing securities with very high credit quality. These may be held directly or through a managed investment trust.

Main asset classes

Asset Class	About the Asset Types
Bonds	Includes government and semi-government debt, high grade corporate debt and cash.
Shares	A combination of public market shares and private equity investments (through funds that invest in private market companies). The Trustee intends to scale down the private equity investments in the Market Return Portfolio over time, and this asset class will ultimately consist of public market shares only.
Private Market Assets	Investments in private market assets that are not included in Shares or Property asset types, are selected to enhance the long term returns and diversify the Market Return Portfolio to help reduce risk. In particular, it includes privately-traded debt and privately-traded non-core equity.
Property	Includes private market investments in real estate, infrastructure and similar assets. These include privately-traded buildings, including building developments. Infrastructure includes privately-traded assets.

Trustee-appointed investment managers

Vanguard Investments Australia Ltd
– public market shares, bonds and cash
Macquarie Investment Management Limited
– currency risk management

Use of derivatives

"Derivatives" are financial instruments that derive their value from an underlying asset (e.g. futures and options on shares or indexes). The APSS's investment managers may use derivatives to achieve their investment objectives, for example, to manage investment risks and costs.

The Trustee has established compliance and audit processes to ensure that the authorised use of derivatives by the APSS's investment managers complies with all relevant legal requirements and APRA directives.

Investment strategy (cont.)

Investments greater than 5% of total APSS assets

The table below shows the individual investments that held more than 5% of the total APSS assets during the 2013-14 financial year:

Investment fund	APSS assets as at 30 June 2014
Alternative Investment Private Syndicate Fund A	A\$ 2,621,358,002
Vanguard® Cash Reserve Fund	A\$ 1,279,578,426
Vanguard® International Shares Index Fund (Hedged) AUD	A\$ 600,757,586
Vanguard® Emerging Market Shares Index Fund	A\$ 313,421,058

Each fund is a pooled investment vehicle (unit trust) that holds many underlying investments. None of the individual underlying investments exceeds 5% of the total assets of the APSS.

Operational Risk Reserve

Effective 1 July 2013, the APSS established an Operational Risk Reserve (ORR) in accordance with APRA prudential standards. This reserve is managed in accordance with the Trustee's Operational Risk Financial Requirement Strategy. The Trustee may use the reserve to make a payment to address an operational risk event. The target level of this reserve is 0.25% of the Scheme's assets.

The ORR is expected to initially be funded (over a three-year period) by a combination of:

- amounts deducted from the Defined Benefit assets (these amounts will be ultimately paid for by Australia Post and Associated Employers), and
- amounts deducted from the investment returns of the APSS before Crediting Rates for Member Savings are set. These amounts are not deducted directly from Member Savings or Pension accounts but form part of the management costs of the Market Return and Cash Return investment options for the 2013-14 year.

The Trustee's investment strategy for maintaining the ORR is to invest the assets of the ORR in the same manner as the APSS's Cash Portfolio. The Trustee's investment objective and strategy and asset allocation for the Cash Portfolio are set out on pages 8-9 and page 11. The Trustee's objective is to ensure that the ORR does not experience negative investment returns and is highly liquid, thereby ensuring that these amounts will be readily available to satisfy the settlement of any operational losses in a timely manner. This investment strategy will be reviewed at least annually.

The ORR was established on and from 1 July 2013. The balance of the ORR was zero as at 1 July 2013 and \$7.5 million as at 30 June 2014.

Asset allocation

The asset allocation is the distribution of assets in an investment portfolio between different asset classes. The charts below show the target and actual asset allocations for the Market Return and Cash Return Portfolio as at 30 June 2013 and 30 June 2014.

Market Return Portfolio - 2013

30 June 2013

Market Return Portfolio	Target	Normal range [^]	Actual
Bonds	20%	18-22%	20%
Shares	55%	50-60%	41%
Private market assets	17.5%	15-20%	13%
Property	7.5%	5-10%	26%

Market Return Portfolio - 2014

30 June 2014

Market Return Portfolio	Target	Normal range [^]	Actual
Bonds	20%	18-22%	20%
Shares	55%	50-60%	49%
Private market assets	17.5%	15-20%	10%
Property	7.5%	5-10%	21%

* This asset class is made up of a combination of public market shares and private market opportunities. Remember, the Trustee intends to scale down the private equity investments in the Market Return Portfolio over time and this asset class will ultimately consist of public market shares only.

[^] The actual asset allocation is normally expected to fluctuate (go up or down) within these ranges over time. If it moves outside the normal ranges, the Trustee will take prudent and commercially responsible steps to re-balance to the target allocation.

Cash Portfolio

30 June 2013 30 June 2014

Cash Portfolio	Target	Actual	Target	Actual
Cash	100%	100%	100%	100%

More information

Detailed explanations of these asset classes are provided in APSS Product Disclosure Statements (and associated booklet, if applicable) for APSS Member Savings and APSS Pensions, available online at apss.com.au in the *Publications & Forms* section, or call SuperPhone on **1300 360 373** to request a copy.

APSS net assets at 30 June 2014		7,047

* At the time of preparing this report, the APSS's approved auditor is in the process of auditing the financial statements of the APSS. Audited financial statements are submitted in September each year for adoption by the Trustee. When adopted by the Trustee, a copy of the audited financial statements and the Auditor's Report for the 2013-14 financial year will be available on written request.

More information

The APSS Product Disclosure Statements for each membership category are updated regularly to take into account changes. Copies of the most recent Product Disclosure Statements and other helpful publications can be downloaded from the website at apss.com.au or you can call SuperPhone on **1300 360 373**.

Your Trustee Directors

The legal entity responsible for operating a superannuation fund is known as the Trustee. This section provides information about PostSuper Pty Ltd, the APSS's Trustee.

Appointment and removal of Member Representative Directors

In accordance with rules approved by the Trustee, one Member Representative Director is nominated by each of:

- the Communications Electrical Plumbing Union of Australia
- the Community and Public Sector Union
- the Australian Council of Trade Unions.

Member Representative Directors are appointed for a term of no more than three years, at which time they are eligible for reappointment. They may be removed or replaced at any time by the relevant union or if they resign or retire.

Rules exist to deal with the process for the appointment and removal of Member Representative Directors.

A copy of the rules is available from the APSS Governance page at apss.com.au (under *About the Scheme*), or may be obtained by calling SuperPhone on **1300 360 373**.

Appointment and removal of Employer Representative Directors and Independent Directors

Employer Representative and Independent Directors are appointed for a term of no more than three years, at which time they are eligible for reappointment.

The three directors appointed by Australia Post may be removed or replaced at any time at Australia Post's discretion or if they resign or retire.

The directors can appoint an Independent Director (who will be the Chairman, as provided in the Trust Deed). For an independent director to be removed or replaced, a two-thirds majority of directors must pass a resolution. The independent director may also resign or retire at any time.

Trustee Indemnity Insurance

Indemnity insurance has been taken out to protect the Trustee Directors and officers against certain financial losses arising from claims that may be lodged against the Trustee. The cost of this insurance is effectively borne by the APSS employer sponsors through their contribution obligations to the APSS.

Your Trustee Directors as at 30 June 2014

Mark Birrell

Independent Director and Chairman, appointed by other directors

MEMBER REPRESENTATIVE DIRECTORS:

Dan Dwyer

Appointed by the Communications Electrical Plumbing Union of Australia (CEPU)

Jim Metcher

Appointed by the Australian Council of Trade Unions (ACTU)

Louise Persse

Appointed by the Community and Public Sector Union (CPSU)

EMPLOYER REPRESENTATIVE DIRECTORS:

Jim Marshall

Appointed by Australia Post

Michael Tenace

Appointed by Australia Post

Catherine Walsh

Appointed by Australia Post

CHANGES TO THE BOARD

Catherine Walsh was appointed to the Board as an Employer Representative Director on 24 February 2014, replacing Allison Harrop who resigned on 29 November 2013.

Eligible Rollover Fund

Employee and Spouse members

Once an employee member leaves employment with Australia Post or their Associated Employer, we will write to ask what they want to do with their superannuation. We do the same for Spouse members who cease to be eligible to hold a Spouse Account or whose spouse is no longer employed by Australia Post or the relevant Associated Employer.

If you do not tell us what you want to do with your benefit within 60 days of us writing to you, your superannuation will be paid automatically to the Eligible Rollover Fund (ERF). Your superannuation may be transferred to the ERF without your prior consent (unless we are prevented from doing so by law). You may only receive one notification that your superannuation will be sent to the ERF.

Rollover members

Rollover members whose account balance has fallen below \$1,000 will be automatically transferred to the ERF. This is unless you give us payment instructions within 60 days or the APSS is prevented from doing so by law.

Once your superannuation has been transferred to the ERF

Once your superannuation is transferred to the ERF, you will no longer be a member of the APSS. The Trustee will no longer administer or pay your superannuation to you. In this event, you must contact the ERF to access your superannuation.

The ERF, appointed by the APSS, provides a capital guarantee that ensures returns will never be negative. It provides no insurance cover for death or total and permanent disablement.

You can arrange for superannuation that has been transferred to an ERF to be transferred to another approved fund or it can be paid to you subject to preservation requirements. It cannot be transferred back into the APSS.

An ERF is not generally considered to be a suitable investment vehicle for your superannuation over the long term because it generally invests in assets with limited potential for long term growth.

For APSS Pension members, the ERF does not apply. Please contact the ERF if you require further details:

More information

Surcharge tax

Employee and Spouse members

While surcharge tax was abolished from 1 July 2005, surcharge assessments from earlier financial years may still be outstanding. If you are affected by surcharge tax, you will owe the APSS an amount representing the surcharge tax the APSS has been required to pay on your behalf. The amount that you owe to the APSS as at 30 June 2014 is shown on your Surcharge Tax Account balance in your 2014 Benefit Statement (Periodic Statement Part 1). This amount accrues with interest at the 10-year Commonwealth Government Bond Rate.

The APSS deducts your Surcharge Tax Account balance from your benefit when it is paid to you. This will only take into account surcharge tax assessments that the APSS has received from the ATO as at that date.

Member Savings can be transferred to an APSS Surcharge Tax Account to reduce the balance. For details call SuperPhone on **1300 360 373**.

Rollover members

If the Trustee receives a surcharge tax assessment from the ATO in respect of you, an amount representing the surcharge tax that the APSS is required to pay to the ATO on your behalf will be deducted from your APSS Rollover Account balance at that time. Any deductions for surcharge tax that were made during the 2013-14 financial year will be shown in your 2014 Benefit Statement (Periodic Statement Part 1).

Tax File Number

It's important that you provide the APSS with your Tax File Number (TFN). We are authorised by law to ask you for your TFN. You don't have to provide it, but if you don't:

- the APSS cannot accept after-tax contributions made for you
- additional tax* may be deducted from any before-tax contributions made for you
- the APSS may be required to withhold tax at the top marginal rate (plus the Medicare levy) from the taxable portion of your APSS benefits (if applicable)
- it will be more difficult to trace different super accounts in your name.

* For the 2014-15 year, the rate of additional tax is 30% plus the Medicare levy of 2% plus an additional 'temporary budget repair' levy that applies for three years from 2014-15.

Your contact details

As an APSS member it is important that you keep the APSS updated with your contact details, including your email address and mobile phone number. These communication methods are increasingly being used by the APSS to enhance member communications.

More information (cont.)

Illegal early release of superannuation benefits

There has been an increase in the illegal early release of superannuation benefits. Legal restrictions apply for accessing your superannuation. For details, refer to the relevant APSS Product Disclosure Statement (and associated booklet, if applicable), available at **apss.com.au** in the Publications & Forms section or call *SuperPhone* on **1300 360 373**.

Protecting against identity theft

Your APSS Benefit Statement (Periodic Statement Part 1) contains sensitive identity information about you and personal financial information about your APSS benefits. It is extremely important that you protect it from misuse or identity theft. The APSS has a number of security measures in place, including proof-of-identity verification to protect your personal information.

Privacy Policy

The APSS has always respected your privacy, and has policies in place to make sure your personal information is kept private and confidential. These policies are aligned with the requirements of the Federal Government's privacy laws.

You can access the Trustee's Privacy Policy online at **apss.com.au** or by calling *SuperPhone* on **1300 360 373**.

We value your feedback

Send your ideas and suggestions anytime at **apss.com.au**, by clicking on *Contact Us* and completing the e-form or call *SuperPhone* on **1300 360 373**.

Procedures for inquiries and complaints

APSS members can call *SuperPhone* on **1300 360 373** with inquiries or to request information.

If you wish to make a complaint about a Trustee decision, please make it in writing, preferably using the APSS complaint form. Call *SuperPhone* if you would like us to send you an APSS complaint form. All complaints will be brought to the attention of the APSS Inquiry and Complaints Officer (ICO). Contact details for the ICO are as follows:

Inquiry and Complaints Officer
APSS
Locked Bag A5005
Sydney South NSW 1235

The Trustee has established a formal Inquiry and Complaints Procedure to make sure all inquiries and complaints are properly considered and are dealt with as required under the law.

If your complaint has not been resolved to your satisfaction under the APSS internal procedures within 90 days, you may have a right to lodge a complaint about the decision with the Superannuation Complaints Tribunal (SCT).

The SCT is an independent body set up by the Federal Government to review trustee decisions relating to members (as opposed to trustee decisions relating to the management of the super fund as a whole). Contact details for the SCT are as follows:

Superannuation
Complaints Tribunal
Locked Bag 3060
Melbourne VIC 3001

Phone: 1300 884 114
Fax: (03) 8635 5588
Email: info@sct.gov.au
